

AMITY UNIVERSITY

— R A J A S T H A N —

SDG11: Sustainable Cities and Communities

University has developed its campus with the commitment for quality delivery in academics and created an ecosystem which made University environmentally friendly in its systems and practices.

Besides establishing state of art infrastructure with maximum utilisation of environment friendly technologies, University has mentioned the same in its mission statement i.e., commitment towards societal and environmental responsibility. University has created the awareness amongst stakeholders to support art and heritage for which several activities have been undertaken. University is committed to genuinely utilize natural resources and believe in reduce-recycle-reuse its majority of the waste for inhouse landscape management for which battery-operated transport (Golf Carts), modern irrigation technology, and Solar Power generation system are in use. University has created a cohesive environment and maintain open door policies including accessibility of its resources for nearby communities. ASAP, ASFA, ASLA are organising several events/ activities to protect culture and heritage. University provide affordable on campus housing for its students and employees.
