

Amity School of Architecture and Planning **DIORAMA**

DIORAMA

A scale or miniature model/ Diorama is most generally a physical representation of an object, which maintains accurate relationships between all important aspects of the model. This enables it to demonstrate some behaviour or property of the original object without examining the original object itself. The most familiar scale models represent the physical appearance of an object in miniature, but there are many other kinds.

The Dioramas are then used for photograph modelling such that the photographs of the miniatures appear to be a real scale object. The effects are generated either optically when the photograph is taken, or by digital post processing. Many diorama effect photographs are taken from lower angles to simulate the effect of looking up on a miniature.
