Theme of the Special Session

This special session has a purpose to aim at gathering scientists, engineers and researchers with interest in research and application in Big Data Analytics as well as different applications of IoT. Today a huge number of systems collect a very large data with inherent and increasing complex structure and dimensionality. Therefore the problems of management of very large information volumes those academics, companies, organizations, centers of research have to face and the impact on the organizational information systems. IoT applications are not only limited to smart homes or smart cities IoT is also a building block for providing better health facilities. Unmanned systems are amalgam of IoT and soft computing techniques. In this special session the focus of our group is especially on the proposed theme of big data analytics and IoT applications.

Topics of Interest: We invite original(unpublished) research contributions based on the abovementioned theme including following topics **but not limited to**:

- Big Data & Perspectives
- Big Data Analytics in Health
- Massive Data in Higher Education
- Data Mining
- Data Fusion
- Decision on Uncertain Data
- IoT for Higher Education
- Security Issues in IoT
- Social Networks and Data Analysis
- Smart City
- E-Governance in Smart Cities
- Unmanned Systems – Application of IoT
