ANNOUNCEMENT & CALL FOR PAPERS

08 February, 2017 – 10 February, 2017

Venue
Amity University, Greater Noida – 201308

Organized by
Amity University, Greater Noida
Amity Center for Interdisciplinary Research, Noida
Society for Reliability Engineering, Quality and Operations Management (SREQOM)

Co-Organized by
Luleå University of Technology, Sweden
OBJECTIVE

Interdisciplinary Research allows us to answer complex questions, address broad issues, explore disciplinary and professional relations, solve problems that are beyond the scope of any one discipline, achieve unity of knowledge.

The goal of this conference is to contribute, on both theoretical and practical levels, to analyze the potential of multidimensional relations and interactions of Education, Research and Technology with economy, society considered as fundamental contributors to integrated development. One of the major areas of emphasis in academia in recent years has been interdisciplinary research, a trend that promises new insights and innovations rooted in cross-disciplinary collaboration.

The other joint conference, Quality, Reliability, Infocomm Technology and Business Operations is 8th in its version. It's being held since 2000 at INSA/Delhi University. Proceedings of these conferences have been published by Narosa, Macmillan etc. The conference has earned name for itself in India and abroad creating a network which has fostered research collaborations.

Interdisciplinary research allows researchers, students, and faculty members with a goal of connecting and integrating several academic disciplines, professions, or technologies. Study of any system in isolation can be easier but may not provide the optimal results. On the other hand, the theory of single discipline may prove to be inadequate in explaining the academic interactions with other systems. Here there is a dire need for interdisciplinary approach wherein distinguishing features formerly separated disciplines can be interwoven. Interdisciplinary Research allows us to answer complex questions, address broad issues, explore disciplinary and professional relations, solve problems that are beyond the scope of any one discipline, achieve unity of knowledge.

The topics of the Conference would include but not restricted to:

- Information and Communication Technology
- Information System Development & Management
- Marketing
- Risk Analysis & Assessment
- Information Process Engineering & Management
- Soft Computing
- Power System Reliability
- Probabilistic Safety Management
- Business Process Re-Engineering
- Ad-Hoc Networking
- Information System Design & Development
- Artificial Intelligence & Neural Network
- Project Planning and Tracking
- Business Intelligence Tools & Applications
- Finance
- Operations
- Multi Criteria Decision Making (MCDM)
- Software Reliability Engineering
- Business Operations
- Big Data Analytics
- Quality Management & Control Theory
- Reactive & Passive Project Change Management
- Cyber Defense & Information Technology
- Web & E-Business Integration Architecture
- Computational Complexity
- Active Safety Critical Systems
- Data & Intelligent System Modeling
- Black Net & Blind Network
- Registry Forensic
- ERP and ICT Integration
- Virtualization & Cloud Computing
- Information Security, Laws and Ethics
- Systems & Network Security
- Energy Efficient Computing
- Supply Chain Management
- Human Resource
- E-Business and Mobile Commerce
- Digital Image Processing
- Enterprise Resource Planning
- Global Privacy Issues
- Information Privacy and Ranking
- Cryptography & Crypto-analysis

There will be special sessions for invited lectures by eminent experts from the fields of Quality, Reliability, Business Operations and other areas.

CALL FOR PAPERS

Authors interested in presenting research papers of theoretical/applied nature or case studies are invited to submit an Abstract not exceeding 250 words latest by December 15, 2016. The abstract should include keywords/phrases, full address along with the broad conference topic. The conference souvenir will contain abstracts of the papers accepted for presentation.

CONFERENCE PROCEEDINGS

The refereed proceedings of the conference will be brought out after the conference. Registered delegates will be entitled for a copy of the proceedings. Full paper in Springer format is to be submitted by January 15, 2017. Accepted papers are eligible for publication in the Conference Proceedings published by leading publisher, subject to page limitations. Some selected papers will be published in special issues of International Journal of System Assurance Engineering and Management (IJSAEM), Springer, International Journal of Quality Reliability Safety Engineering, World Scientific.

REGISTRATION FEE
