

# CURRICULUM

**Please create three tabs as Primary Level, Middle Level and Senior Level and upload related content.**

PRIMARY LEVEL

MIDDLE LEVEL

SENIOR LEVEL

PRIMARY LEVEL

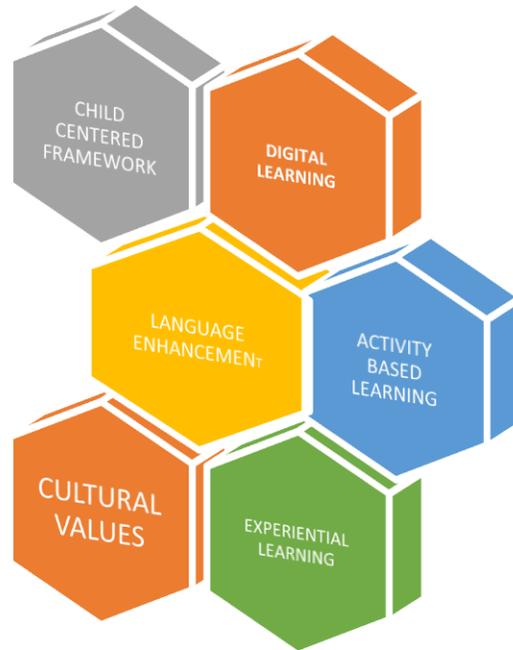

Learning should stimulate and sustain the child's interest as it should be joyful. We have designed a curriculum that enables the child to acquire language competency, a systematic organisation of ideas to develop his/ her creative imagination, and independent thinking.

- Through the new thematic / integrated approach, the child explores his / her environment in greater depth, where a concept does not end with the lesson. The child studies his environment and understands it as best as he can. He investigates, explores and observes. Science and Social Studies cease to be separate entities.
- Making Math a part of this means that the subject is no longer boring numbers. It is used in everyday life. Numbers become real and meaningful. Language skills are learnt as the child learns to master the above mentioned concepts.
- All topics covered are supported with Power Point Presentations, interactive sessions and hands on activities. Innovative, contemporary concepts are projected and reinforced through different subjects – “experiential learning” culminating in ‘joyful learning’ is the ultimate goal.
- A blend of mass participation along with an emphasis on a strong sense of individuality is stressed upon.
- Special assemblies like Rakshabandhan, Independence Day, Gandhi Jayanti, Earth Day etc. create awareness among students and sensitize them towards values and special issues.
- Technology are an integral part of the curriculum; children enjoy and pick up basic computer skills through games and child friendly software.
- The content of AUP books has been developed meticulously so that the child looks at it from all aspects – the scientific, ecological and from the point of view of social studies.
- Integrated Projects based learning(IPBL) activities help children corelate all the importance of all subjects.

## MIDDLE LEVEL

The emphasis at Middle School, besides following the NCERT guidelines, is on developing the right study habits and securing an in-depth knowledge of the subject.

- The curriculum is research oriented and is based on teamwork. Selection of matter and presentation is given utmost importance.
- Personality development, value education and coping with peer pressure are stressed upon at this stage.
- The syllabus enables the child to acquire language competency, a systematic organisation of ideas to develop his/ her creative imagination, and independent thinking.
- Through the new thematic / integrated approach, the child explores his / her environment in greater depth, where a concept does not end with the lesson. The child looks at it from all aspects – the scientific, ecological and from the point of view of social studies.
- Through integrated project based learning (IBPL) children gain proficiency in the proper usage of the language and good communication skills and help in conceptualizing and in the student's overall understanding of the real-time environment.
- The books follow a multi-skill, activity based, learner centred approach with special emphasis on listening, speaking and creative writing.
- The mutual interaction of teacher-inspired activity and learner-inspired activity maintains an effective environment.

## SENIOR LEVEL

Senior School curriculum as planned by CBSE is followed in letter and spirit. Children are encouraged to go beyond the scope of the syllabus.

- Education here is interspersed with projects, surveys and reports, debates and discussions that cover the latest trends and discoveries. The emphasis at this stage is to research, reflect, analyze and conclude what is being taught and learnt through the syllabus.
- A variety of subject combinations including latest prescribed skill subjects by CBSE like Data Science, Legal Studies, Financial Marketing Management etc. are offered to give more options to students for their Undergraduate courses.
- An equal stress is laid on preparing students for the prescribed CBSE syllabus and on preparing the students for the various competitive entrance examinations.
- Result oriented training is imparted by experienced faculty who target for total development and desired success.
- Professional career guidance is given to students at early stages to help them chose right stream and subject combination.
- Leadership skills are inculcated through involvement of students in school student council body.
- Regular active participation in Student Exchange Programmes, Project Based Learning, Field Visits, Debates, Declamations, Symposiums, Power Point Presentations, Panel Discussions, Community Service Projects, Youth Power activities, MUN, Guest Lectures etc. help prepare students for a life outside school boundaries from early years.
