### DRIVER SOBERNESS SYSTEM FOR ROAD VEHICLES

The basic idea behind this research is to prevent person under influence of alcohol to start and drive any road vehicle. The system takes power from the vehicles, existing battery and is switched on as the key of the vehicle is set to on position. The system then waits for a sample of breath as an input and then analyzes it for the traces of alcohol.

If any traces of alcohol or over speed/rash driving are monitored; the device is kept off ignition of the vehicle immediately, and glow LED signals with buzzer sound to warn the driver promptly.
