

## **PLANTATION OF TREES/ PLANTS THAT REQUIRE MINIMUM WATER.**

Trees are the most important facet of our environment and lives because it not only gives sustenance to the nature but also sustain the growth of living beings including us.

It is our duty to plant more trees and take care of them in order to maintain balance between man and nature and it is equally significant to propagate the cause so that the existing and the forthcoming generations are made aware of the invaluable requirement of trees/plants in the world.

The green environment not only make the country economically developed but save the globe from greenhouse effect therefore we should plant trees on a large scale.

It's our duty to take a pledge to take responsibility to increase the Maximum number of saplings in our environment. Another aspect which is significant is to conserve water by planting the species which require least water for its growth.

Amity University also focuses on the need for such plants and trees which requires minimum water. To manifest the same in the last few years the University has planted the following Hedges/Tress/plants:-

### **Hedges**

- Inerme
- Ficus Panda

### **Trees**

- Neem
- Foxtail Palm

### **Flower plants**

- Marigold
- Pitunia

### **Plants**

- Snake Plant
- Crotons

- Rubber Plant

The aim for having a diverse plantation of trees/plants was to have an all-round beautification and be able to manifest in its growth with minimum water. Apart from above there are numerous trees/plants in the University which further facilitates in Water conservation. Plantation can be a small step towards protecting the environment, maintain biodiversity and conservation of water.

### **PLANTS REQUIRING MINIMUM WATER**

**SNAKE PLANT**

**CROTONS**

## INERME

## MARIGOLD

### DATA REQUIRED

**Outsourced Staff for more than two years**
