ABOUT AMITY UNIVERSITY GURUGRAM

Amity University Gurugram is built on a foundation which embodies all the qualities that have made Amity institutions world-class over the last two decades. It has instituted global standards in education, training and research with state-of-the-art infrastructure and the latest teaching methodologies. With industry-integrated curricula, the University trains future leaders of the corporate world by blending modernity with tradition in each of its students. The campus provides a multicultural environment with the presence of students from across India and more than 15 countries. The amity group is home to over 1,50,000 students, pursuing 300 programs in 60 diverse disciplines, from preschool to Ph.D.

ABOUT THE CONFERENCE

The core tasks of emergency/trauma nurses include providing immediate and effective nursing care, administering emergency medication and drugs, and performing emergency nursing procedures as needed to stabilize patients in the ICU or other emergency care setting. Emergency nursing is becoming increasingly complex, not only in relation to the outcome of new technologies & medicine, but also in caring for an increasingly ageing population, many with long term conditions & social care needs. This complexity of delivering care requires that emergency/trauma nurses respond with an equivalent complex skill set, underpinned by an advanced knowledge base as well as the core caring skills. Emergency & Trauma Nursing conference-2020 will focus on influential plenary presentations, skill-based workshop sessions and clinical practice and outcomes, through oral and poster presentations.

OBJECTIVES:

Objectives of the conference:

1. At the end of the conference, the participants will be able to: Integrate, update and enhance the knowledge, skills & abilities of the health care professionals on cardiac, respiratory, neurological, trauma emergencies & common poisoning.
2. Discuss the medico-legal issues and challenges as well as evidence-based practices relevant to emergency & trauma nursing.
3. Acknowledge and appreciate the research activities in emergency & trauma nursing in the form of scientific paper and poster presentation

Objectives of the workshop:

At the end of the workshop, the participants will be able to: Develop skills on BLS, neurological assessment, primary & secondary survey and ECG.

Day 1 Schedule: 21st January 2020

Time	Event	Resource Person
9-9:30 am	Registration
