

AMITY UNIVERSITY

MADHYA PRADESH

(Established by Ritnand Balved Education Foundation)

Public Access to Libraries- Allow Based on Applications

Providing public access to libraries is fundamental to fostering education, community engagement, and lifelong learning. Libraries serve as knowledge hubs, offering free or affordable access to books, digital resources, and educational materials that empower individuals of all ages and backgrounds. Public libraries play a key role in bridging the digital divide, offering internet access and technology to communities that may otherwise be underserved. They also provide a space for cultural exchange, community programs, and intellectual growth, hosting workshops, lectures, and events that cater to diverse interests. Inclusive access to libraries ensures that everyone, regardless of socioeconomic status, can benefit from the wealth of information and resources they offer. By promoting literacy, supporting research, and encouraging critical thinking, libraries contribute to the social and economic development of communities, making them indispensable pillars of public access to knowledge. University provides **public access based on applications** from outsiders. The university ensures privacy and security for valuable books and journals.
