[Amity University](#) is a research driven University which offers higher education in diverse field from Engineering, Management, Life Sciences, Applied Science and the like. Amity University provides quality platform for research in field of Academics. The campus is organizing International Conference on Contemporary Computing and Informatics on 14th– 16th September 2023.

This Conference includes many topics which were deeply deliberated and which brewed new ideas. Thus, giving rise to new avenues for researcher. We aim to take those concepts further to derive fresh hypothesis and arrive at the logical deductions. The participation of scientist from across the globe was very encouraging in our last conferences organized in India. This time we are anticipating even larger congregation from more diverse domains as we are reaching out too many eminent philosophers, thinkers and academicians from scientist fraternity.

Aim and Scope:

This special session welcomes academicians, budding technocrats, researchers, and scientists who have a keen interest in Big Data Analytics, Data mining, the Internet of

Things, and computational intelligence approaches. These areas are crucial for solving practical engineering issues and providing solutions to complex problems in well-known fields such as data processing, smart homes, smart devices, and predicting student outcomes using educational data mining. Researchers are encouraged to focus on these areas, as they are currently the most important fields in which to work. Additionally, the use of nature-inspired ideas is expanding as they have the ability to provide the best solutions to complex real-world problems. Therefore, academics and researchers are invited to submit their work to this special session related to the suggested theme.

Sub-themes (but not limited to):

Topics to be discussed in this special session include (but are not limited to) the following:

- Internet of Things
- Cloud Computing
- Artificial Intelligence
- Educational Data Mining
- Learning Analytics
- Software Engineering
- Computational Intelligence
- Big Data Analytics
- Deep Learning
- Machine Learning
