

Message

I am pleased to welcome all the authors and delegates to “International Conference on Automation, Computational and Technology Management”. This conference is another stone which we are adding to the research mosaic of conference series organized at Amity University. The overwhelming response in last five conferences has made us proud and we are grateful to all the participants. I am thankful to IEEE (UK and Ireland) Section dignitaries for extending their technical sponsorship to us. I am also thankful to our academic partners for their participation.

Computation and Automation is field of relevance in this era. Automation and Computation is not only restricted to Computer Science Engineering but effects most disciplines of engineering such as Fluid Mechanics, Vehicle Crash Simulation, Biology & Medicine, Civil Engineering and FEA, besides Environmental Engineering and Nuclear Engineering. By combining various facets of engineering under one roof, with the perspective of Computation and Automation, we have tried to create an atmosphere where interdisciplinary points of views shared would further establish the derived hypothesis.

I am sure that all of you will greatly benefit in the august company of renowned scholars, whose rich experience and knowledge will benefit greatly to the new entrants in the field of research. I once again extend my gratefulness and warm wishes to all the participating authors and delegates.

Dr. Anish Gupta

Organizing Chair, ICACTM -2019

Assistant. Dean Academics

Amity University Greater Noida Campus
