The council also shares industry insight exposures which will be very useful for departments to design and develop curriculum in line with industrial needs and produce future ready professionals. In very first, departments incorporate expert views in credit restructuring & amends some new/ need based courses and upgrade their programmes. The university institutionalized this concept in its practices which successfully gives multiple mileage in programme development, R & D delivery, and student progression. Amity Innovation Incubator has also been established and is fully operational to develop innovation and entrepreneurship.
- **Activity Based Teaching Learning & Evaluation** - University ensures to deliver quality in teaching learning & evaluation for which we have institutionalized lots of global/national practices to produce future ready professionals. Besides implementing concept of fifty percent continuous evaluation across the university we have inducted practices to provide multiple evaluation tools like peer presentation, case studies & flip classes which creates vibrant platform and provide opportunity among students. Students have also been allotted domain specific problems for which a group works under the allotted faculty mentors and present in a form of case to panel of experts. Evaluation of foreign language is done in continuous mode (100%) as it is skill enhancement categories. Faculty members are designing vibrant teaching learning evaluation plan for ongoing semesters instead of frequent conduction of classroom test.
- **Non-Credit Value-Added Courses** - For holistic development of students, the university has designed skill and capacity building courses which are non-credit and optional, floated among the students with the aim to develop industry ready global professionals.

6.3 COURSE PREPAREDNESS OF FACULTY

University's Quest for Excellence, desire to bring global trends in the curricula and extensive use of IT enabled teaching and learning practices, has resulted in preparing students with well-honed skills compatible with the Global Market.

At Amity, Quality Teaching is fostered with the use of innovative pedagogical techniques to produce learning outcomes for students. It involves several dimensions, like the effective design of curriculum and course content, a variety of learning contexts (including guided independent study, project-based learning, collaborative learning, experimentation, etc.), soliciting and using feedback, and effective assessment of learning outcomes. It also involves well-adapted learning environments and student support services.

Fostering quality teaching is a multi-level endeavor at Amity. Support for quality teaching is practiced and monitored at three interdependent levels:

- Individual level: including initiatives that help teachers achieve their mission, encouraging them to innovate and to support improvements in student learning and adopt a learner-oriented focus.
- Program level: comprising actions to measure and enhance the design, content and delivery of the programs within a department or a school.
- At the Institution level: including projects such as policy design, and support to organisation and internal quality assurance systems.

Amity prepares students for entry to an environment that is characterised by greater uncertainty, speed, risk, complexity and interdisciplinary working and equip them with appropriate skills, knowledge, values and attributes to thrive in it. There is a strong drive to build and create knowledge together with an understanding of working life and reformulate the concept of knowledge in learning situations. Strong connections with working life through different academic projects provide authentic opportunities to learn both generic and professional competencies as well as to build networks and pathways for employment after graduation.

The salient points of the pedagogy are:

1. Detailed Course Delivery Plan

- a. Learning objectives of the course.
 - b. Continuous assessment scheme, i.e. components, schedule and feedback.
 - c. Common thread through the course objectives, syllabus, pedagogy and the assessment scheme.
 - d. Listing topic wise allocation of sessions.
 - e. List of text and references (numbers and quality).
2. Power Point Presentations for all the sessions (1 credit course requires 10-12 hours of teaching and for one-hour teaching, ideally 6-8 slides).
3. Other Teaching Material
 - a. Teaching notes and material in addition to the prescribed text.
 - b. Guidelines on short projects.
 - c. Write-up on term paper.
 - d. Relevant articles and papers.
 - e. Tutorial sheets, as defined in the program structure.
 - f. Experiments to be carried out in labs, their objectives and methodology.
 - g. Use of videos/ films, including the objective to be achieved.
4. Making the Course Practice Oriented
 - a. Field/industry visits, their planning, objectives and summary report leading to evaluation.
 - b. Projects.
 - c. Case studies and other exercises.
 - d. Guest lectures/panel discussions.
5. General guidelines for students regarding attendance, punctuality, meeting the deadlines, chamber consultation hours, prior self-study to be undertaken etc.
 6. Finally, efforts are made to judge how much rigor the course has created for the students. In a professional program, normally the mandate is that a student has to put in 2-3 hours of self-study for each hour of classroom teaching.

6.4 SYSTEM OF EDUCATION

Semester System

Amity University follows a semester system, which is in conformity with the global practices and standards. The Course curriculum of one year is taught in two semesters, i.e. 17-18 weeks each. The Semester system promotes greater interaction between faculty members and students and permits more meaningful term paper and research assignments.

Grade System

The level of students' academic performance is the aggregate of continuous evaluation & the end term examination and is reflected by letter grades on a Ten Point Scale. Letter grades (A+,

A, A-, B+, B, B-, C+, C, F) have points associated with them in quantified hierarchy and have qualitative meaning. Semester Grade Point Average (SGPA) & Cumulative Grade Point Average (CGPA) are calculated based on the students' performance in Semester(s) & overall performance, respectively.

Amity University follows Absolute Grading as well as Relative Grading depending upon the strength of students in a particular program & batch. Students are required to maintain minimum SGPA & CGPA to pass a semester and promotion to the next semester and qualify for Degree/Diploma.

100% Attendance

Every student in Amity University is required to achieve 100% attendance in all the Lectures, Tutorials and Practicals and Seminars arranged for the respective course during the semester. However, a relaxation up to a maximum of 25% is granted in case of contingencies. A minimum of 75% attendance is required to appear in the examinations. 100% attendance criteria ensure academic excellence, disciplinary approach and growth of the student.

Internal Evaluation System

The scheme of examinations & evaluation is one of the most important components of judging the academic performance and development of the students. Therefore, in Amity, the students are assessed at regular intervals. 50% weightage is given to continuous/internal assessment in a semester wherein 3-4 evaluation components with weightages are defined. It covers Class Test, Viva, Quiz, Case Discussion /Presentation /Analysis, Home Assignment, Project, Seminar, Term Paper, Attendance etc.

6.5 CURRICULA & SYLLABI

The detailed course curriculum of all the programs in Amity University is reviewed at regular intervals as per the industry requirements. For this, many points are considered such as feedback reports on the placements, employability of the passed-out students, latest developments in the technology, statutory compliances of various bodies, etc. The course syllabus is first examined and evaluated by an expert committee which is then reviewed by the Board of Studies of the institution for recommendations to the Academic Council for approval.

The Program Structure is prepared for each Program that includes a semester-wise course (core and electives) to be taught, any internship to be undergone, project/dissertation as per requirement of the program curricula. Each course contains details of the course code, classroom hours, practical/lab classes, tutorials, self-study hours and credit units.

The credit units attached to each course are defined in terms of contact hours, i.e. Lectures (L), Tutorials (T) and Practicals (P). Towards earning credits in terms of contact hours, 1 lecture and 1 tutorial per week are rated as 1 credit each and 2 practical hours per week are rated as 1 credit. In a full-time degree Program, a student is required to earn on an average 25-30 credit units per semester. The credit units attached to Summer Internship/Training (8-10 weeks), fieldwork etc. are included in this total.

As a mandatory requirement, 'Boards of Studies' are constituted for each Institution after approval of the President for the structuring of Academic Programs, viz. framing of Curricula, Syllabi, and Scheme of Evaluation, etc. The Various Boards of Studies hold their meetings and

after rigorous scrutiny, the course structure and curricula of the Academic Programs offered are implemented with the approval of the Academic Council.

6.6 CHOICE BASED CREDIT SYSTEM

In accordance with the guidelines of the University Grants Commission, Amity University has implemented the Choice Based Credit System (CBCS) Programme in which the students have a choice to choose from the prescribed courses, across the courses being offered by the University, which are referred as core, elective or minor and they can learn at their own pace and the entire assessment is graded-based on a credit system.

The basic idea is to look into the needs of the students with the aim to keep themselves up-to-date with development of higher education in India and abroad. CBCS aims to redefine the curriculum keeping pace with the liberalisation and globalisation in education. CBCS allows students an easy mode of mobility to various educational institutions spread across the world along with the facility of transfer of credits earned by students.

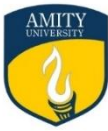

6.7 ACADEMIC CHANGES DURING THE YEAR

Programme Review & Credit restructuring- Departments have organized Board of Studies (BoS) and Industry advisory board (IAB) meetings and taken domain related updates which they further incorporated in the ongoing programmes and restructured credits. We have harvested some time by above credit restructuring and utilized in organizing co-curricular activities. University has ensured programme upgradation in line with industrial requirement to prepare future ready students.

6.8 MONTHLY STRUCTURED MEETINGS
