# CONFERENCE THEME

## Concept Note:

The climate has factually changed, with global warming wreaking its havoc around the world. Rivers are drying, glaciers are melting and many regions of the world are experiencing record-breaking temperatures, inflicting much suffering all around. Freak climate-triggered events such as flood, famine and typhoons are endangering our very existence. Against this backdrop of looming climate emergency, India has pioneered a homegrown initiative for sustainable and healthy lifestyle called LiFE - Lifestyle For the Environment and placed it on the global agenda, including at G20. LiFE is an international mass movement towards “mindful and deliberate utilisation, instead of mindless and destructive consumption” to protect and preserve the environment through Fashion & Textiles. The LiFE action plan includes nudging individuals to practice simple yet effective, environment-friendly actions in their daily lives (demand), enabling industries and markets to respond swiftly to the changing demand (supply), and to influence government and industrial policy to support both sustainable consumption and production (policy).

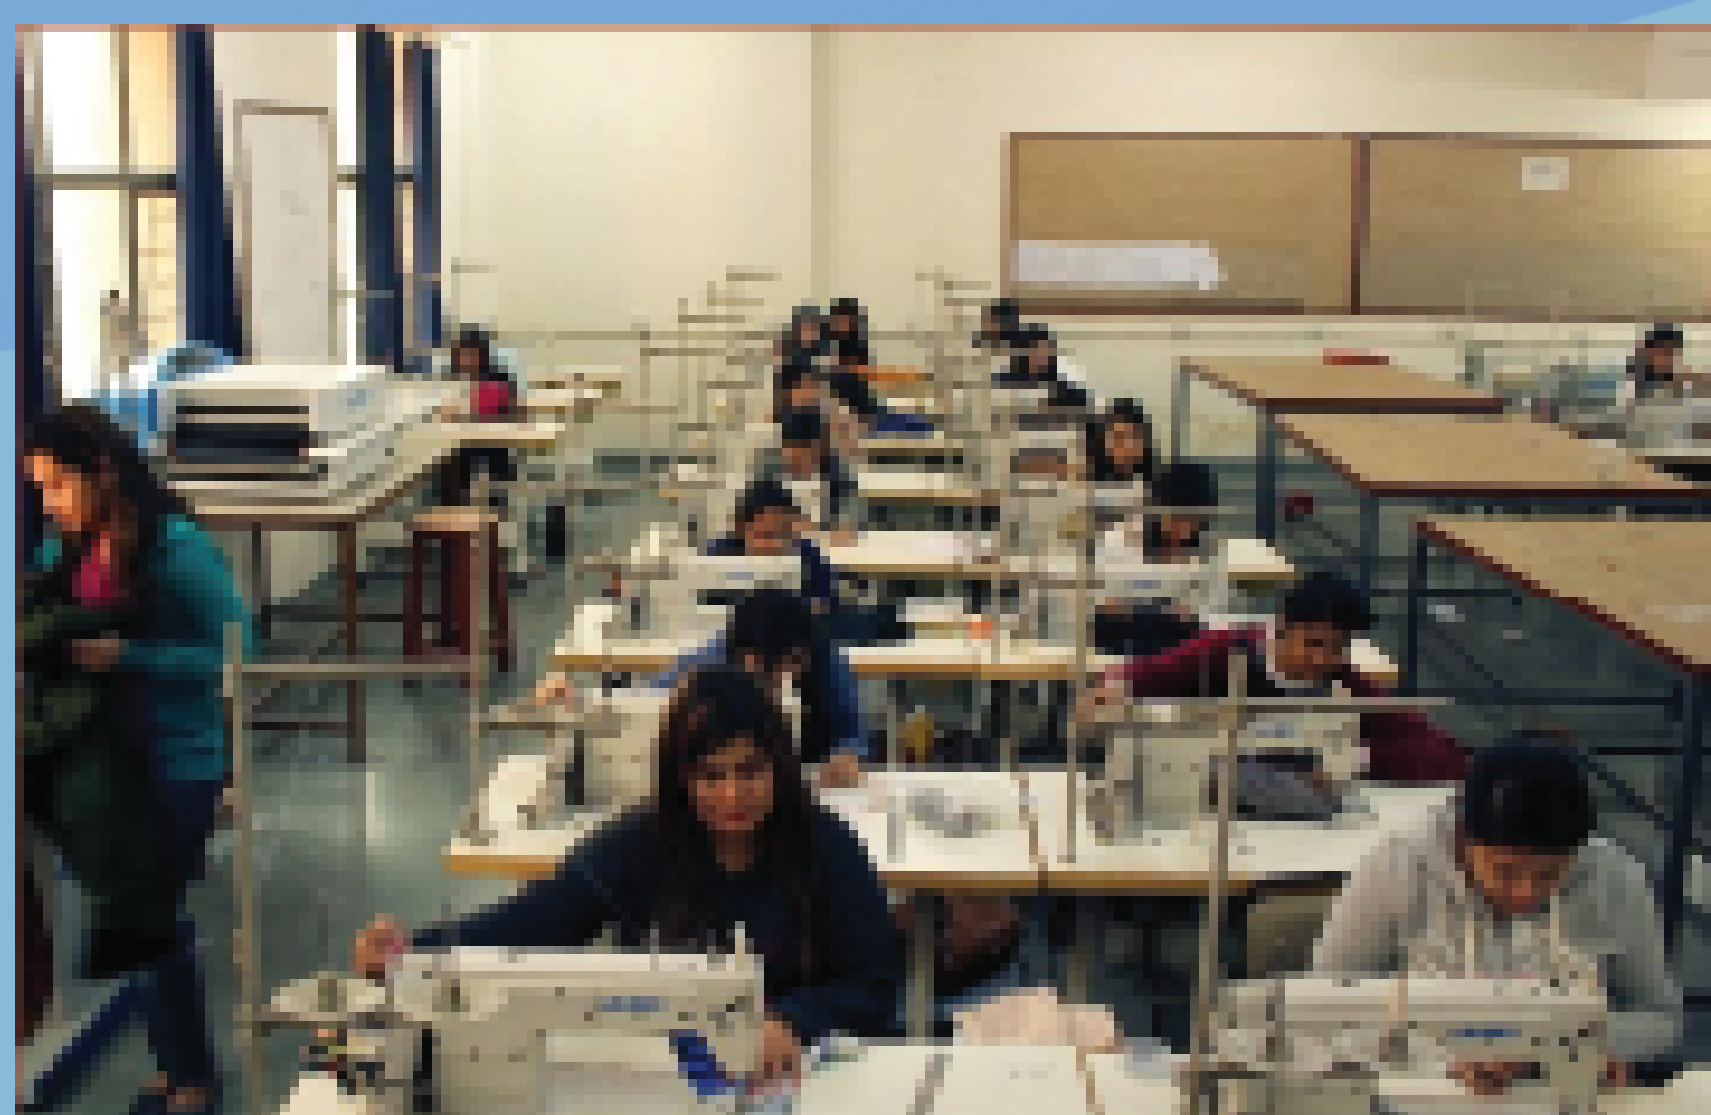

## Event Objectives:

- The Conference aims to create awareness of initiatives of G20
- The Conference aims to bring together International Speakers, Fashion Brands, retailers and delegates from G20 member & guest countries.
- The conference has an objective to bring together leading academicians, researchers, industry professionals and research scholars to exchange and share their experiences and research results on LiFE for Fashion & Textiles.
- The conference drives to explore opportunities for economic growth or technological innovation in Fashion & Textiles in G20 countries known for sustainability

Theme: “LiFE: Opportunities & Challenges for Fashion , Textiles & Design”

The conference will mainly focus on following areas. The list of topics is indicative and research papers in related areas will be considered.

- Sustainable Fashion
- Innovation and Sustainability in Fashion & Textiles
- Responsible Consumption and Production in Fashion & Textiles
- Sustainable Materials in Fashion & Textiles
- Smart Apparels
- Sustainability in Luxury Fashion
- Reuse, reduce and recycling in Fashion & Textiles
- Emerging role of Digital Technologies and AI in Fashion & Textiles
