Roles & Responsibilities

Profile – 1 (Clinical Analyst)

Job description:

Zyla provides holistic medical care personalised for each individual. Your role involves a wide range of activities from clinical research, developing clinical protocols, patient management, validate clinical research, retrospective and prospective studies, and data analysis. You will be responsible for interacting with patient and specialist doctors. You will be engaged in developing the world's first chronic care management tool with a multi-speciality care team as its core.

We are building a team of passionate, energetic and self-motivated individuals who want to transform healthcare delivery and touch millions of lives using their talent and innovation.

Education and experience:

- B.Pharma/M.Pharma
- Bonus points for internships in hospitals/ clinical settings

Skills:

- Knowledge of Pharmacology for chronic diseases.
- Knowledge in handling chronic patients with medical conditions such as diabetes, hypertension, dyslipidemia, GERD, NALD, etc.
- Top-notch task management and scheduling skills.
- Exceptional **verbal and communication skills**, with an ability to formulate and present analysis and arguments in a clear, crisp and structured manner.
- Excellent time-management skills.
- Proficient in **MS Office, Email and English**.
-

Responsibilities:

- Analyze patient data and create patient health summary documents.
- Research and create protocols for drugs, diagnostics, patient symptoms, vital tracking, etc.
- Create training material for doctors on lines of treatment, treatment best practices, patient counselling.
- Interact with patients regularly.
- Develop systems and processes for standardizing the quality of care.
- Work in tandem with other 'care team' members such as doctors, psychologists and physiotherapists to provide holistic care to patients.

Profile – 2 (Clinical Nutrition)

Role & Responsibilities:

- Interacting with patients regularly via telephonic or video calls.
- Counseling chronic patients and motivating them for inculcating lifestyle changes.

	<ul style="list-style-type: none"> • Developing a nutrition plan and modifying it based on adoption/feedback from the patient. • Analyzing patient data and engaging in virtual patient management. • Researching and creating protocols for drugs, diagnostics, patient symptoms, vital tracking, etc. • Engaging with the product and technology teams for the development of algorithms. • Developing systems and processes for standardizing the quality of care. • Working in tandem with other 'care team' members such as doctors and physiotherapists to provide holistic care to patients. <p>Profile – 3 (BD – Ops)</p> <p>Responsibilities:</p> <ul style="list-style-type: none"> • Help with day-to-day operations related to sales efforts by the BD team. • Onboard patients on the Zyla platform; helping them understand the platform, benefits, and next steps associated with the program. • Lead and own the complete responsibility of the patient onboarding process. • Connecting with multiple stakeholders from different teams to ensure the onboarding process is smooth. • Ensuring correct registration of patient data across Zyla Data Centers.
