Role   -   **Production Support Exe**

Responsibilities:
- When you work on a project, your mandate is rather restricted and the learning is rather limited to the requirement, but in support there are no restrictions to learning
- Current requirement is more Technology/Configurationally support than Functional Support on the product
- Working opportunity on various technologies like database (SQL, Oracle and Sybase), Middleware(Jboss, Web Sphere, Web Logic), OS (UNIX, AIX, Windows)
- Opportunity to learn the product entirety and financial domain
- Direct client interactions which help associate to learn and understand the various business models and multi-tier technology implementation or architecture
- Product Support is a revenue earning model for IT industry and have bright future
- Year by Year the production support demand is growing very fast in comparison to any other stream
- Salary for the technical + functional production support is higher in market

Skill Set Required:

- Ideally any campus project experience in the following areas:
  - J2EE Web servers (WebSphere, WebLogic, JBoss, and Tomcat)
  - MS SQL Server/DBA and/or Oracle Enterprise/DBA
  - Windows Operating Systems (server and workstation)
  - UNIX (Solaris, Red Hat, and AIX)
  - LDAP, Active Directory, single sign on (SiteMinder, TAM)
  - ANSI SQL, Transact-SQL and PL/SQL
- Fluent in written and spoken English
- Good Probing, Analytical and Presentation Skills.
