Roles & Responsibilities	• Licensing Support for inventors or patent holding firms. This includes finding infringing products for the technological invention disclosed by the subject patent. • Invalidation Searches where we try to invalidate the novelty of a subject patent based on patent or non-patent literature before the filing date of a patent (prior art). • Technology Landscapes in which we profile a technology and provide an analysis on patent filing trends, key players, their filing trend over the years etc. Such an exercise includes analyzing trends in upcoming technologies and their evolution. • For example, a cloud computing technology landscape would provide patents filed by large firms active in the cloud domain with their patents further categorized in categories such as Software as a Service, Infrastructure as a Service, and Platform as Service etc • Apart from these we provide a range of other basic and advanced services customized to the needs of our client. • An individual working as a patent researcher/analyst is therefore expected to have panache for technical understanding and a general idea of recent technological advancements in the field of computer science or electronics & telecommunication.
